cardfive
professional card design software

Total integration environment

CardFive allows you to easily manage your design, database and printing jobs with a fully integrated environment.

Database connection and features

With a multifunctional versatility, create your own database and get maximum connectivity to any ODBC.

Database features allow you to use simple data entry, locate, create, edit, query, save and print records.

Multi professional resources

Encode magnetic stripe, contactless smart cards or connect to any smartcard application to encode your contact smartcard at print time.

Store and synchronize database and Biometric terminals.

Use WYSIWYG interface to take control of your card design. Integrate any picture format from digital photo camera with TWAIN image acquisition, real time imaging through Video for Windows, or any other images on the database.

Printing speed and Maximum error control

CardFive prints to any plastic card or paper printer using Windows drivers but also provides the most complete internal drivers list. Using DCL (Direct Command Language) this will improve your printing speed and errors control.

Security and diversity

CardFive is available in 6 languages.

Separate access rights for different users guarantee total security access.

professional card design software

WYSIWYG

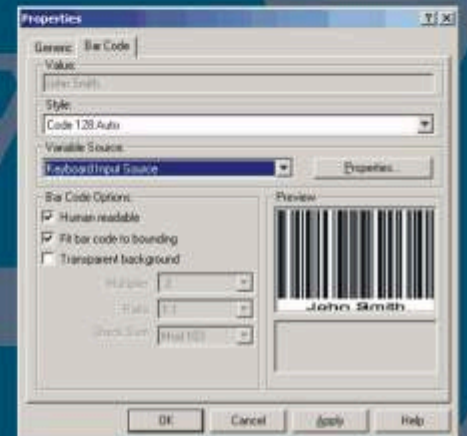

Easy, flexible and with full control

The integrated environment allows you to easily manage all operation from design, database, encoding to printing jobs with no need for preview operations.

Encode magnetic stripe, track 1, 2 and 3 directly. Use ISO, JIS-II or customer encoding.

Choose from 21 barcode types defining source, rotation, protection, if human readable or transparent background.

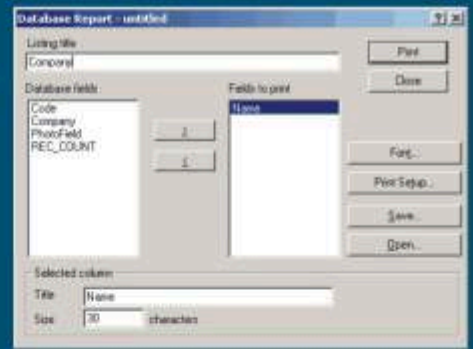

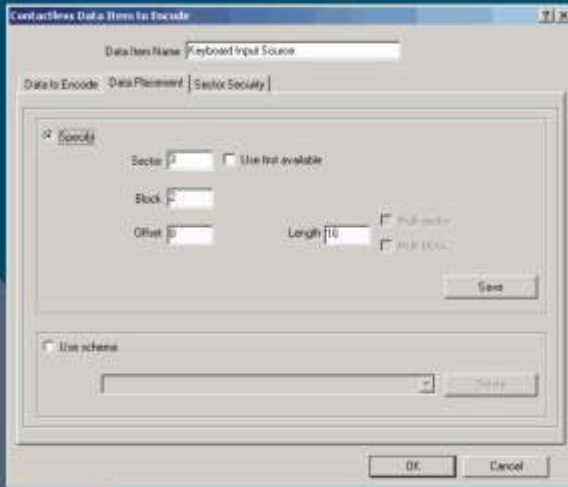

Use images from database and file or get directly with video for Windows and Twain acquisition interface.

nfive

Database Versatility

Find a record or select a desired set using queries.
Create, save and print a list of records including photos.

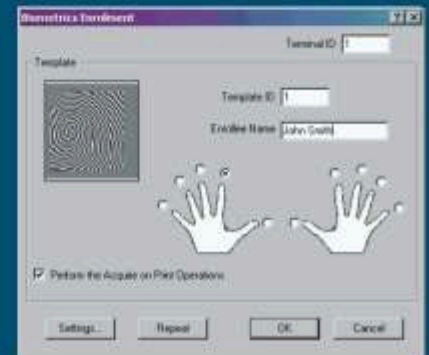

Contactless Encoding

Encode Contactless cards directly or by external plug-in with full control over the process. Encode and print Mifare and HID cards defining data placement and managing access conditions. Database fields update with data read from the contactless smart card.

Biometrics Handling

Manage Biometrics terminals. Store, print and synchronize database and Biometrics terminals. Acquire fingerprint image and save on database, encode fingerprint data in a contactless card at print time.

Upgrade your CardFive software with RLL

In order to upgrade to a different edition CardFive uses RLL technology (Remote License Loader). This revolutionary system uses the latest smartcard technology and upgrades your CardFive by simply running a small EXE file that is delivered by email. The RLL window will appear, click on "Replace License"; the new license is loaded and your new edition is now ready to use.

Face Snap - The optional Super Plug in

Face Snap Plug-in is a software application that works with CardFive starting with version 5.2

Very useful for video badging production, automatically recognizes faces, locates them and crops with 10% of the surrounding area, creating a perfect identification photo.

Improve image quality and customize image settings defining standard conditions.

Add Face Snap Plug-in by RLL technology

CardFive is available in various editions in order to meet user's needs and budgets.

Editions

Cardfive Features

Package & Instalation

	Classic	Lite Plus	Premier	Professional	Elite
Setup Programs on CD	✓	✓	✓	✓	✓
Microsoft Windows Compatible - 95/ 98/ Me Windows NT/ 2000/ XP	✓	✓	✓	✓	✓
KeyFive (smart card) software protection with serial or USB interface	✓	✓	✓	✓	✓
Manual Printed and On-Line (6 languages)	✓	✓	✓	✓	✓
Multi-lingual versions - English, French, Spanish, German, Portuguese and Italian	✓	✓	✓	✓	✓

Tools & Imaging

WYSIWYG Multi-Document Interface - No need to preview operation	✓	✓	✓	✓	✓
Barcodes & PDF 417 2D - Major barcodes styles, rotate, align, check digits, human readable and transparent background. Encode photos in PDF 417 Two-dimensional barcode	✓	✓	✓	✓	✓
Variable objects - System sources	✓	✓	✓	✓	✓
Import Image from file - BMP, TIF, TGA, PCX, JPG, WMF	✓	✓	✓	✓	✓
Windows and Private Clipboard - Collect or past items from card software clipboard or using Windows Clipboard	✓	✓	✓	✓	✓
Build-in Image Tools - Adjust and control Image properties	✓	✓	✓	✓	✓
Twain Image acquisition Interface - Scanner, digital camera or any Twain device to acquire photos	✓	✓	✓	✓	✓
Clipart - Gallery picture	✓	✓	✓	✓	✓
Variable objects - Database sources			✓	✓	✓
Video for windows image acquisition Interface - Real Time Video on a card				✓	✓
Logins - Separate access rights for each user: design, edit data, print setup				✓	✓

Printing

Front and back printing management - Design and print of both sides of the card	✓	✓	✓	✓	✓
DCL's and Windows driver printing - Direct Command Language to major printers on the market and get maximum speed and error control or print to any printer by Windows driver.	✓	✓	✓	✓	✓
Overlay management - Select type of overlay (Full, NO, Selected area, bitmap based, predefined and autolocation)	✓	✓	✓	✓	✓
Batch printing - Pre-print, revise, select, print overlay management	✓	✓	✓	✓	✓
Bitmap Overlay feature - Print bitmap as overlay	✓	✓	✓	✓	✓
Autoprint - Automatically print cards by adding records				✓	✓
MultiStation printer handling - Mass production. Allows multiple cards to be printed simultaneously					✓

Database

CSV Database connection - Connect to comma separated value files		✓	✓	✓	✓
Internal Database - Create database without need any external application			✓	✓	✓
Photo on a Database record - Add photos to records of the database			✓	✓	✓
Database query - Using query select a desired set of records			✓	✓	✓
Database Create/Edit - Add and manage tables from database			✓	✓	✓
External Database - Maximum connectivity with ODBC (Access, Paradox, FoxPRO, Excell, text, SQL)				✓	✓
Database report - Create, save and print a list of records including photos				✓	✓

Encoding

Magnetic Encoding - Encode Track 1, 2 and 3 directly or via Windows driver. Use ISO, JIS-II or Customer encoding	✓	✓	✓	✓	✓
Contact Smart Card Encoding - Use any smart card application to encode at print time	✓	✓	✓	✓	✓
Contactless Smart Card Encoding - Encode Mifare and HID cards directly or using external device					✓

Biometrics

Biometrics devices supported - V-Smart & V- Pass from Bioscrypt					✓
--	--	--	--	--	---

Face Snap Optional Plug-in - Plug in added to CardFive by RLL technology. Identify a face on a picture, crop the face out of the scene and improve image quality	✓	✓	✓	✓	✓
---	---	---	---	---	---

Free updates from our Web Site	✓	✓	✓	✓	✓
---------------------------------------	---	---	---	---	---

Net Licenses - Edition to run with master license on same (LAN) network			✓	✓	✓
--	--	--	---	---	---
